## 30dB Gain Amplifier

### INTRODUCTION

The SK-860S is a commercial quality amplifier with 30dB gain across a bandwidth of 50 ~ 860 MHz. The output of this amplifier is easily adjusted by using the front panel gain control with 10dB gain control range.

### FEATURES

1. 30dB gain
2. Frequency range of 50 ~ 860 MHz
3. Tilt and gain control in the front panel
4. Excellent value
5. -20dB test port

### SPECIFICATION

INPUT			
Input Connector		75 Ω F-Female	
Frequency Range		50~860MHz	
Gain		30dB	
Flatness		± 1.0dB	
Gain Control		10dB	
Tilt Control		10dB	
OUTPUT			
Output Connector		75 Ω F-Female	
Test Point Loss		20dB	
GENERAL			
Mounting	Wall-mounted	Operating Temperature	0 ~ 50 ℃
